# Single Seater Phone Booth

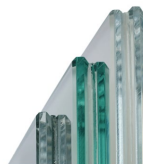

## Multifunctional socket

We've integrated USB and Type C interfaces in our office pod sockets, streamlining your work experience and making it more convenient and barrier-free.

Aluminum frames

The Hecorpod has a sturdy frame made from strong aluminum used in airplanes. This makes sure that the product lasts a long time and does not get damaged easily.

Double-layer laminated glass

Hecor's office pods are designed with 6+6mm double-layer laminated glass, providing superior sound insulation of at least 30db.

## Human-centered

Hecor office pod is not only comfortable and soundproof but also provides you with everything needed for your job or creative project from good air quality, natural light and privacy – all while giving priority to people over things!

- ✦ Fresh air
- 🪑 Ergonomic Furnishings
- 🔊 Noise isolation, for concentration

## Unbeatable quality

Our coworking pods are built with aerospace-grade aluminum and double-layer laminated glass, similar to that used in subway train compartments. These premium materials guarantee long-lasting and reliable workspaces for your needs.

## Sustainable design

At Hecor, we prioritize sustainable design in our office pods. Our aluminum frames and wall panels are recyclable and reusable, with a low carbon footprint. We also use materials with 0 formaldehyde to ensure a healthy indoor environment.

- ✓ Low carbon footprint
- ✓ 0 formaldehyde materials
- ✓ Minimized waste and reduced energy consumption

D1000 x W1080 x H2326mm

1. 6\*6mm laminated soundproofing tempered glass
2. Aviation Aluminum Frame
3. 4000K natural light system( motion sensor control)
4. Silent ventilation system ( motion sensor control)
5. Socket with USB B&C power supply
